

# System i (AS/400): Advanced Security Workshop for Financial Institutions

Presented by  
Gordon F. Morris, CBA, CISA

This one day seminar is designed to provide the IT, audit, and security professionals with the technical skills needed to implement more effective data security procedures in this IBM mid-range system environment. The seminar includes:

- Review of critical System i (AS/400) security issues.
- Understanding and reducing or eliminating special authorities on user profiles.
- Reviewing and understanding vendor application security and overall system security issues.
- Identifying and securing vendor-related programs with adopted privileges that could be misused.
- Learning to use SEU, PDM, SDA and other System i (AS/400) programming tools.
- Creating CL programs with adopted privilege to better control user functions.
- Softlight Auditor - Fine-tuning reporting and troubleshooting typical problems.
- **Softlight Auditor – review of the new release and new features.**
- GFM Security Evaluator – using the reports effectively to identify security issues.
- **GFM Security Evaluator – release reporting features and enhancements now available.**
- New Features in **i5/OS V6R1** for 2009.
- Other issues identified by attendees.

At the end of the seminar, attendees will have a much better understanding of security issues and corrective measures that can be taken to strengthen the overall security environment.

**Class size will be strictly limited to allow for one-on-one instructional assistance. Attendees are strongly encouraged to bring their own laptop PCs with Client Access software installed. Use of VPN connections to their own in-house system (if available) will enhance the capability of attendees to immediately address issues on their systems.**

Internet access will be provided for attendee laptops. In addition, a System i (AS/400) will be available for connection to assist in testing security features and writing CL programs.

**WHO SHOULD ATTEND:** Experienced IT auditors, Data Security Officers, and Information Technology personnel responsible for ensuring effective procedures are in place for the System i (AS/400) system.

## Seminar Registration
