

System i (AS/400): Concepts & Basic Operations

Presented by
Gordon F. Morris, CBA, CISA

This ½ day seminar is designed to introduce System i (AS/400) operational concepts to the IT staff, audit, & security professionals that are new to this system environment. Having a good understanding of how the overall system functions increases the ability to grasp and understand the security concepts introduced in the next level seminar. The seminar includes:

- Overview of the System i (AS/400) Architecture & Features.
- Review of the vendor, IT staff and End-User system interfaces (Menus, Commands, etc.).
- Review of Object Orientation on the System – Libraries, Programs, Menus, Users, Commands, etc.
- Review of Basic Operator Functions – Devices, Jobs, Messages, Save/Restore Features.
- Review of Handling of Computer Output Reports – Output Queues and Spool Files.

At the end of the seminar, the instructor will be available to assist attendees with specific questions and concerns that they may have. Attendees are encouraged to bring sample reports from Softlight Auditor, GFM Security Evaluator, or similar products to review and discuss during the session.

SEMINAR OUTLINE:

- System i (AS/400) Overview & Architecture
- User Interfaces
- Object/Work/Data Management
