

IT Security & Audit Webinars from GFM Consulting (\$125.00 each)

We are pleased to announce our next offerings of live hosted one hour web-based seminars over the next few weeks. Attendance will be limited to no more than 15 persons at a time to allow for effective interaction. *If more than 15 persons register we will offer the sessions again one hour later. Register quickly since space is limited. Each webinar is \$125.00.*

1. System i (AS/400): Security Level I

February 21, 2012 – 10:00 AM – 11:00 AM Central Standard Time

This webinar is the foundation security session for the System i (AS/400). We will cover overall system security concepts and then review the various system values to control security and the proper setup and control of user profiles.

2. System i (AS/400): Security Level II

February 21 2012 – 2:00 PM – 3:00 PM Central Standard Time

This webinar will get into specifics of securing and auditing critical commands, identifying security risks with PC connections and how to control them. This webinar will build on the information learned in the seminar above. We will also go into more technical details on how to eliminate special authorities on most user profiles, concerns with specific programs that adopt authority.

3. System i (AS/400): Using Softlight Auditor Effectively

February 22, 2012 – 10:00 AM – 11:00 AM Central Standard Time

This webinar will review the configuration of Softlight Auditor to produce the most effective reports for monitoring security. A summary of reports and what to look for will be reviewed during the session. In addition, trouble shooting techniques will be reviewed to assist the user in understanding and correcting common issues – no reports, large reports, etc.

4. System i (AS/400): Using GFM Security Evaluator Effectively

February 22, 2012 – 2:00 PM – 3:00 PM Central Standard Time

This webinar will review the use of the GFM Security Evaluator software product to produce effective reports for reviewing the status of system level security and various application level security settings (core banking products). A summary of each report and what to look for will be reviewed during the session. In addition, we will review extra tools available to assist the user in actually securing and auditing critical commands, source files, and more.
